How can High Nature Value farming be supported by the CAP?

PILLAR 1.

1

- Eco-schemes
- Prioritising HNV farming in any other direct payments

PILLAR 2.

2

- Advisory, training and support measures for sustainable farming
- Prioritising payments to Natura 2000, organic farming and specific traditional practices (e.g. grazing on common land)
- Innovative and sustainable modernisation investments
- Agri-environmental schemes tailored to local conditions, needs and objectives (e.g. aimed at public goods delivery).

COMMITMENT TO INNOVATIVE INSTRUMENTS

That will boost both HNV and common land farming all over Europe

Collaborative and multi-actor approaches in interventions under art. 64 (e.g. "cooperation")

Land Management Contracts and Land Stewardship Agreements

Land Banks

Results-based payments

Farm incubators

Essential in finalising the future CAP

- Maintain the inclusion of HNV systems in the biodiversity "specific objective" of the CAP (Art. 6, Para 1, Point f)
- Reject any proposal that allows ring-fenced environment funding to be spent for other purposes activities which do not prioritise environmental objectives (like the current art. 85 (a) 'new', regarding planting protein crops, or areas with specific constraints)
- Maintain enhanced conditionality.
